

Your Mission is Our Passion

# Full Dive Virtual Reality Training Platform

**“Train like you fight”**

## Transformative Training with Full Dive Virtual Reality

The Full Dive Virtual Reality (FDVR) Training Platform offers an unparalleled, immersive multi-sensory experience almost indistinguishable from the real world. Using environmental content developed for maximum visual fidelity and realism. Our FDVR platform is designed to deliver individual and team training in immersive training scenarios in all contested environments (air, land, sea, space) for the military warfighter, law enforcement, and military and civilian medical professionals. With customizable scenarios, it equips users with mission-specific training that supports their critical work and enhances readiness.

## Full Dive VR Training Platform Features List:

- Human performance assessment and improvement
- Cognitive behavioral assessment and tracking
- Resilience skill building
- Video playback capabilities with assessments and AAR
- Secure real time data management with AI powered analytics and storage
- Realistic immersive sensory feedback
- Full cloud distribution capability for training teams/individuals together anywhere in the world
- Scalable to the needs of the user and hardware agnostic
- Biometric tracking 24/7 for multi-day training: pre, live, and post training
- Biofeedback and restorative capabilities
- ANY potential real-world environment can be duplicated in FDVR

**Primary system supports but is not limited to a 360 omnidirectional treadmill, high fidelity VR headset, immersive haptic hardware, and biometric tracking.**
